

Copilot Technical Readiness

Supercharge your data security
before its too late...

A man with a beard and tattoos, wearing a blue polo shirt, standing in front of a red wall with shelves. The man has a beard and is wearing a blue polo shirt. He has tattoos on his arms, including a skull and a figure. He is wearing a white watch. The background is a red wall with shelves.

Hi There, I'm Alistair Pugin

— CEO | MVP | Architect | Podcaster

About Me

CEO | Microsoft MVP | Architect | Podcaster

Alistair has over 29 years of experience working in the Information Technology Space. He started as a COBOL programmer in 1994 but moved into hardware in 1995. For the last 24 years he has been working in the Enterprise Information Management space focusing on Microsoft solutions.

He currently helps customers modernize their IT Landscape when moving their datacenters to Microsoft Azure and Microsoft 365, focusing on platform remodeling, application and content services (ECM), and Zero Trust architecture.

He is a Microsoft [Most Valuable Professional](#) and have been since 2013.

Why Microsoft 365 Copilot

The journey to becoming AI powered

Leadership

Develop leadership capabilities to leverage AI for business outcomes

- ✓ Foundational learning
- ✓ Business strategy
- ✓ AI Council creation
- ✓ Providing clarity and prioritization

Human change

Manage the human transformation through robust user enablement programs

- ✓ Invest in the employee experience
- ✓ Improve the culture
- ✓ Authentically integrate feedback

Technical skills

Build and iterate technical skills to deliver on business results

- ✓ Provide access to training and experts
- ✓ Manage and mitigate risk
- ✓ Improve service management process

Responsible AI principles

Leverage AI for business outcomes

Get tips for your AI journey with actionable guidance from early adopters with the [Business Leader's guide for AI adoption](#).

Explore practical guidance for aligning AI strategy with business goals and mitigating risk with the [Leading in the Era of AI: Creating an AI Council – An Exercise in Transparent Leadership](#) whitepaper.

Learn about building trust and putting human connections first to get the most from AI with the whitepaper, [Leading in the Era of AI: It's not about AI – It's about trust](#).

Read how those you enlist to support your success will guide it to the next horizon of business expansion with the [Leading in the Era of AI: Recommended Principles for Selecting AI Suppliers](#) whitepaper.

Microsoft 365 Copilot

Implementation summary

Implementation project summary

First 30 days

30-60 days

Recurring tasks

Shared milestone view

Be intentional with seat assignments and define success criteria

Copilot brings AI value across **lines of business**

- 1 Review which departments have the highest Microsoft 365 usage data, starting with Teams meetings and PowerPoint.
- 2 Concentrate licenses across entire teams or departments to start.
- 3 Use the **Scenario Library** to identify top use cases and the key metrics you would like to improve in that functional area.

All roles

- Improve meetings
- Content creation
- Manage daily agenda
- Summarize information
- Generate ideas

HR

- Cost per hire
- Employee turnover
- Compliance risk reduction
- Benefit usage
- Onboarding time

Marketing

- Leads created
- Brand value
- Cost per lead

Operation

- Customer retention
- Product time to market
- Supply chain efficiencies

IT

- Outstanding support tickets
- Application downtime
- Departmental spending

Sales

- Number of opportunities
- Close rate
- Revenue per sale
- Customer retention
- Time to close

Finance

- Accelerate cash flow
- Spend on ERP system
- Risk reduction
- Departmental spending

Real- World Technical Readiness

Journey to Copilot

Get ready

Perform the Microsoft 365 Copilot Optimization Assessment

Optimization Assessment

The [assessment](#) is designed to understand your current licensing profile, your collaboration tools, sensitive data handling, and security controls implemented today in your organization, helping you identify a clear path to deploying for Microsoft 365 Copilot. The assessment consists of 26 questions and takes about 30 minutes to complete.

- [Complete the Microsoft 365 Copilot Optimization Assessment](#)
- Understand current licensing
- Understand identity management
- Understand current collaboration tools
- Understand current data locations
- Uncover opportunities to implement data security measures and improve data security posture to optimize user experience with Microsoft 365 Copilot

aka.ms/Copilot/OptimizationAssessment

Microsoft Copilot for Microsoft 365 Optimization Assessment Results

Thank you for taking the time to complete the Copilot for Microsoft 365 Optimization Assessment. You've taken an important step to understand how far along your organization is in adopting AI. This report highlights the foundational elements you already have to help your organization prepare for its digital transformation journey and take full advantage of Copilot for Microsoft 365.

The answers you provided in the Copilot Optimization Assessment give us your Optimization Scores, which reflects your organization's potential ability to take advantage of Copilot for Microsoft 365 to help increase employee productivity and security posture.

Blockers Identified **0**

This score reflects any primary blockers to overcome to get ready for Copilot for Microsoft 365 and the new era of AI.

Microsoft 365 Copilot-ready users in your organization **67%**

5000 of 7500

Customer Baseline

Organizational Profile Readiness **90%**

19/16

Your organizational readiness score relates to your ability to drive adoption of Copilot for Microsoft 365 through effective organizational sponsorship and awareness of the capabilities of generative AI solutions.

Productivity Tool Readiness **80%**

16/20

Productivity and collaboration are the backbone of Copilot for Microsoft 365. A major benefit of AI is the opportunity to automate certain tasks and improve productivity to help employees focus on the work that matters most to your organization.

Copilot for Microsoft 365 Deployment Path

Best in Class

The Copilot deployment path is part of the overall technical readiness guidance developed to help customers get started with their Copilot deployments quickly and continue to optimize their data security along the way.

Apply appropriate Data Security controls

Get started quickly and continue to optimize along the way

*Restricted SharePoint Search will limit Copilot for Microsoft 365 experiences and organization-wide search. It is a temporary option which gives you time to address oversharing concerns while getting started on your Copilot journey.

Restricted SharePoint Search

This is intended as a temporary solution to give you time to review and audit site permissions while implementing robust data security solutions from Microsoft Purview and content management with SharePoint Advanced Management

Restricted SharePoint Search is designed for organizations particularly concerned about unintentional oversharing of content.

When enabled, Copilot experiences and organization-wide search are limited to a select set of SharePoint sites, as well as the individual user's files and content.

Pre-requisites

- Available to tenants with Microsoft 365 Copilot subscriptions.
- Activation requires Global/Tenant/SharePoint admin rights.

IMPACT

Restricted SharePoint Search disables organization-wide search, while allowing you to select sites that you trust. This means users in your organization can use Copilot to reason over:

- An allowed list of curated SharePoint sites set up by admins (up to 100 SharePoint sites), honoring existing permissions on a site.
- Users' OneDrive, chats they are part of, emails they send and receive, calendars they have access to, etc.
- Files that are shared with and accessed by users.
- Content from users' frequently visited sites.

Build your Community of Practice with Viva Engage

Connect and empower employees

Create a community in Viva Engage to generate excitement, share learning, and support Copilot Champions and experts.

Give employees a place to:

- Share best practices, such as prompts.
- Share success stories of Copilot saving time and driving productivity.
- Access company announcements on AI usage, direction, and mission.
- Facilitate peer to peer learning and Champion engagement.

Get ready

Onboard & engage

Deliver impact

Extend & optimize

Objective: Land and expand Microsoft 365 Copilot awareness and AI skill centric vision for employees

Awareness

- Land AI transformation vision.
- Tailor content by audience, scenario, persona, and usage journey.
- Copilot Champions launch.
- Internal testing for some.

Land the message

Engagement

- Deliver strategic engagements by org and role.
- Ongoing partner and employee education.
- Showcase successes via #CopilotStories.
- Conduct ongoing feedback surveys.

Support the change

Measurement

- Usage, support, and health metrics inform baseline for enablement journey.
- Drive listening systems engagement.
- Improve employee guidance.
- Identify additional scenarios for AI transformation.

Analyze and adjust

Management

- Improve the experience from employee feedback.
- Deliver integrated service roadmaps.
- Iterate messages and tactics bi-monthly.
- Provide employee insights signals in Service Health Review.

Improve the experience

Microsoft 365 Copilot skilling experiences

Microsoft Copilot Academy

- Centralized location to help with the basics of Copilot learning and upskilling, pulling the best content from available free Microsoft sources.
- Structured content in easily consumable learning paths curated by Microsoft experts.
- Develop your AI interaction skills from your Viva Learning app in Teams or webapp.

Microsoft Learn

- Free, on-demand training content for skill development.
- Step-by-step exercises guiding learners through common Copilot prompts and use cases.

Copilot Lab

- Free location to meet, learn about, and test the capabilities of Copilot.
- Improve your prompt engineering skills in an interactive hands-on environment.

Downloadable assets for customization available at adoption.microsoft.com/copilot

Measuring Value and Extending your AI Scenarios

Journey to Copilot

Deliver impact: Establish service management plan

Establish forum for continuous service improvement

Establishing a service management plan empowers IT and User Enablement teams to:

- 1 Periodically review health and business value of the AI transformation journey.
- 2 Conduct periodic assessments of governance, security, and user enablement practices.
- 3 Identify opportunities for expansion and further optimization of key Microsoft Copilot for Microsoft 365 user experiences.

- Access the [admin documentation](#) for the latest technical requirements, policies and reporting.
- Join [the Copilot community](#) to connect with experts and community members.
- Participate in Copilot Ask Microsoft Anything [events](#).

Deliver impact: Access usage reports

Shared
activity

Interpret the Microsoft 365 admin center usage report

The Microsoft 365 Copilot usage report includes two sections: Readiness and Usage.

In the [Readiness section](#), you can review technical eligibility, license assignment, and users who are in a strong position to get value from Microsoft 365 Copilot

In the [Usage section](#), you can view a summary of Microsoft 365 Copilot adoption with visibility into users' last Microsoft 365 Copilot activity.

Interpret the Readiness section by analyzing assigned and available Copilot licenses, how many users are technically eligible, and how many are in a strong position to get value from Microsoft 365 Copilot

If needed, you can export the report data into an Excel .csv file by selecting the Export link. This exports the Microsoft 365 Copilot last activity data of all users and enables your identified report readers to do simple sorting, filtering, and searching for further analysis.

Demo

Copilot reporting in the Microsoft 365 admin center

Extend & optimize

Explore

Identify new high value scenarios

- Gather data from service health reviews
- Prioritize via AI Council and leadership engagement
- Skill/acquire talent for extensibility opportunities

Expand

Understand Copilot Studio capabilities

- Build, automate and administer copilots
- Select extensibility scenarios

Extend

Scale Copilot users and skills

- Extend throughout organization
- Identify high value user cohorts for advanced skill building
- Optimize usage patterns

Extended view: Designing scenarios using the Modern Collaboration Architecture (MOCA) Framework
